Company Profile

A brief overview of the company's history:

- 1945 – Foundation of the Koralewski Industrie-Elektronik oHG in Celle by Ing. Eberhard Koralewski.
- 1988 – Acquisition of the company by the graduated engineers Thomas Koralewski and Claus Wittmann.
- 1998 – Relocation of the expanding company to the current location in Hambühren near Celle.

Our fields of activity are today:

- Developments in steering-, measurement- and control technology, among others methods for analysis for water treatment and monitoring of power network replacement and sprinkler systems.
- Manufacturing of industrial devices, using microcontroller- and SMD technology.
- Development of special solutions for research, for example: Project HealthLab (since June 2008 on the ISS in use) - in co-operation with the German Aerospace Center DLR.

We offer these achievements:

- Innovative, high quality customer-specific system solutions in the field of electronic controlling-, measurement- and control technology.
- The scope of supply and services ranges from the analysis of tasks over hardware- and software development through to serial production.
- Our long term experiences in accomplishment of complex development projects offer a high degree of planning reliability.
